
(A) scalar $\Phi_r(g)$
paired effect
−1.38
p < 0.0001
+0.14
p = 0.004
learning
$48k_D - 0k_D$
coupling
$48k_C - 48k_D$
(B) decoupling
+1.19
p < 0.0001
−0.28
p = 0.005
learning
$48k_D - 0k_D$
coupling
$48k_C - 48k_D$
(C) whole-to-part
paired effect
−2.37
p < 0.0001
+0.40
p < 0.001
learning
$48k_D - 0k_D$
coupling
$48k_C - 48k_D$
(D) part-driven
−0.036
p = 0.006
−0.002
p = 0.58
learning
$48k_D - 0k_D$
coupling
$48k_C - 48k_D$
